I am a Full Stack Web Developer with over 4 years of practical experience in building modern and reliable web applications. I enjoy creating efficient, scalable, and user-friendly solutions that help businesses grow. I work well in team environments and always focus on completing projects on time and within budget. My experience includes integrating third-party services, improving website performance, and maintaining strong security practices. I always try to learn new technologies and follow industry trends so I can deliver clean, maintainable, and high-quality code. I would love to work with you and help turn your ideas into successful web applications.

Technical Skills

Languages & Library: JavaScript, TypeScript, PHP, Java, C++, HTML 5, CSS 3, Tailwind, Bootstrap, jQuery
Frameworks: React, Vue, Angular, Laravel, Livewire
Developer Tools: Git Hub, Postman, Vs Code, Hostinger, Cyber Panel, Go Daddy

Work Experience

Freelancing

(2022 – Current)

I am expanding my expertise by freelancing on platforms such as Upwork and Fiverr, while also undertaking projects from colleagues and other sources. If you can explore my work then click here <https://faiqsarwar.info/project.html>

Riphah International University

(January 2023 – August 2023)

I worked as a Web Developer at Riphah International University, where I actively contributed to innovative web development projects and collaborated with team members. I was also awarded a certificate in recognition of my work. [Click here](#) to visit the certificate.

ADMK Solution

(January 2024 – January 2026)

I am working as a Laravel Developer at ADMK Solution, where I develop and maintain dynamic web applications using the Laravel framework. My role involves building scalable backend systems, creating RESTful APIs, and integrating modern frontend technologies such as Vue.js and React to deliver responsive and user-friendly applications.
